All planting sites / garden beds to be dug to at least a depth of 300mm. A blended soil suitable for native plants added. Blend with existing soil, making sure that sufficient composted material is available to ensure good growth and that good drainage is available. Contact Horticulture Pacific as to soil suitability before planting.

On planting the addition of blood and bone and water crystals will help plants during the establishment period.

All garden beds and plantings to be mulched to a depth of 75 / 100mm with cypress pine chips/bark.

Maintenance should be performed three times weekly for three weeks then twice weekly for 8 weeks. Then as seasonally required.
